Advanced Cardiac Surgery

advancing the science of cardiothoracic surgery

Your **EGDGE** in Pericardial Repair

ADVAPATCH is engineered from precision-cut, durable bovine pericardium treated with **EGDGE** anti-calcification technology—offering superior biocompatibility, optimal handling, and long-term performance across a wide range of cardiac repairs.

Anti-Calcification Protection

Offers protection against progressive calcium accumulation.

Reliable Handling

Smooth edges, uniform thickness, and effortless penetration for seamless suturing.

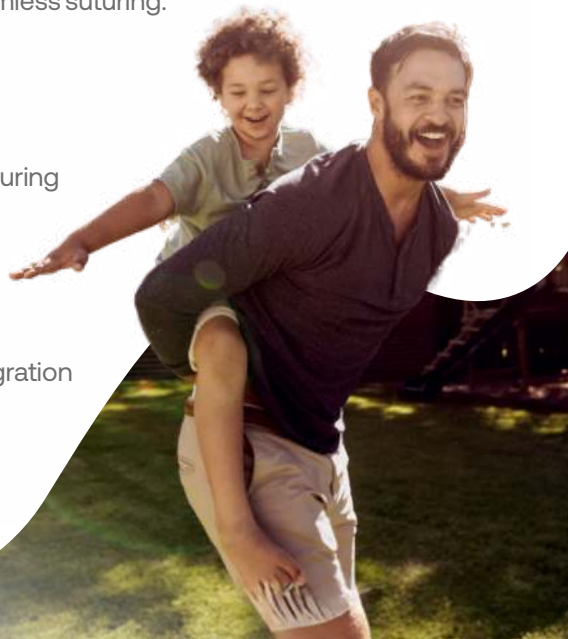

Suture Line Resistance

Maintains strength during suturing for reliable outcomes.

Zero Porosity

Supports smooth tissue integration and reduces leakage risk.

A Patch Ahead of the Curve

Confidence in Every Cardiovascular Repair

Cardiac and Vascular Repairs

Designed to meet the complex procedures.

Durable Bovine Pericardium

Ensures structural integrity and longevity.

Consistent Performance in Procedure

Supports optimal surgical outcomes.

Biocompatibility for Optimal Performance

Biocompatibility

Low antigenicity, high mechanical strength, and resistance to enzymatic degradation.

Tissue Integration Support

Encourages native tissue adaptation with minimal disease transmission risk.

Suitable for Various Procedures

Annular Reconstruction

Aortic Root Enlargement

Endocarditis Leaflet Repairs

Other Vascular Repairs

Septal Defect Repairs
